Experience

As a healthcare supply chain leader, I have a proven track record in driving cost-saving initiatives and enhancing provider engagement. I led the Clinical Value Optimization (CVO) Team, achieving \$757,500 in savings through vendor standardization for Total Joint Arthroplasty. Overseeing systemwide Value Analysis across multiple facilities, I facilitated \$6.6 million in savings over 2.5 years. I developed the Product Disruption Process Tool, resolving 98% of disruptions during the pandemic. My education and certifications in executive leadership, value analysis, and supply chain management empower me to align strategic goals with quality improvement and patient safety initiatives. I am grateful for the support from my leadership, colleagues, and industry partners.

“Dr. Lurie has a strong work ethic and places her colleagues on her shoulders so they can see beyond what she cannot see.”
Susan Johnson, RN
